

# PUBLIC NOTICE

Once sewer mains have been installed, MDEQ requires contractors to clean and TV inspect the sewer mains as part of the inspection, testing, and certification process. Jetter trucks and spray nozzles are being used to clean the mains and the work has caused P-Traps in sinks and toilets in some homes to drain, which can allow sewer gases and odor from the main to enter the home. If you are home, please run water down the drains of sinks, tubs, floor drains, and toilets. If you are not in Fort Smith or Yellowtail and want the District's Operators to check your drains for you, please contact Josh or Todd @ 406-665-7117.
